**NOTES:**

- a. Measured at the discharge terminal point of the compressor package. ACFM is actual cubic feet per minute at inlet conditions of; inlet temperature of 95 F, inlet pressure of 14.5 psia, cooling water temperature of 85 F, and relative humidity of 60%. When an inlet filter is not an integral part of the package an Inlet pressure drop of 0.2 psia shall be applied. When filter is not an integral part of the acceptance test, a test air filter/piping system with this inlet pressure drop specification shall be mounted.
- b. The operating pressure at which the capacity (Item 3) and electrical consumption (Item 11) were measured for this data sheet.
- c. Tolerances are +/- 10% for unloaded power.
- d. Guaranteed value.
- e. Tolerances are +/- 4% for capacity and +/- 5% for specific power.
